AVSPNI CHRISTMAS DINNER & CPD

Dinner with all the trimmings

Thursday 3rd December @ 8pm

How to get more out of your neuro-exam in practice?

1. How to do a neuro-exam in practice
2. How to recognise the most likely diagnosis without MRI.

Supper from 7.15pm

SA Evening Meeting

VSSCo, Lisburn

- During this lecture, we will discuss the basic components of the neurological examination and how this can be implemented in a busy clinical schedule.
- The results of the neurological examination, in combination with other clinical information, can then be used to recognise the most likely diagnosis in your neurology patients.
- We will discuss how the concept of clinical reasoning can help you creating a list of prioritised differential diagnoses.

Steven De Decker

DVM, PhD, DipECVN, MvetMed, FHEA, PGCert Vet Ed, MRCVS

Steven graduated from Ghent University in Belgium. with a PhD in wobbler's syndrome in dogs. Became a board-certified neurology specialist by completing his Residency in Neurology and Neurosurgery at the RVC and is now Professor there. He has been Head of service for Neurology and Neurosurgery for almost 10 years and is now Clinical Director of the RVC's Small Animal Referral Hospital.

With a focus on spinal disorders, neurosurgery and clinical reasoning, Steven has published more than 170 papers in international journals and presented most of his work at international conferences. In 2023 he published a neurology guide aimed to make neurology more accessible for the clinical practitioner.
