

Steroid responsive meningitis arteritis

– one of the most common immune mediated neurological diseases encountered in practice.

AVSPNI Webinar

Thursday 5th March at 8pm

In this webinar, we will discuss the clinical presentation, commonly performed diagnostics, decision making with regards to referral, as well as management and long-term monitoring.

Thomas Mignan

RCVS & EBVS® European Specialist in Veterinary Neurology BVM BVS MRes DipECVN FHEA MRCVS

Thomas graduated from the University of Nottingham in 2016 where his passion for neurology arose. He then moved to Canada to complete a rotating internship at the University of Saskatchewan before returning to the UK to complete by a neurology/ neurosurgery internship at the Animal Health Trust.

Thomas then joined Dovecote Veterinary Hospital in 2018 where he completed a neurology/neurosurgery residency in 2021 shortly before becoming an RCVS & EBVS® European Specialist in Veterinary Neurology in 2022. He enjoys all aspects of neurology/neurosurgery, with a particular interest in intracranial and neuro-muscular disorders.
